

# Key **Safety** Field Inspection **Insights**

Sure, you know safety field inspections keep workers safe and operations going smoothly, but that's barely scratching the surface. Digital field inspection management firm Fulcrum, in conjunction with research firm paradoxes, shares the following insights from its recent eBook.

## Why you need a robust digital safety program

### Business Factors

- Lower EMR for reduced insurance premiums
- Improved reputation for more opportunities for projects/work
- Fewer days of work lost by individuals
- Less site shutdowns
- Reduced/eliminated fines

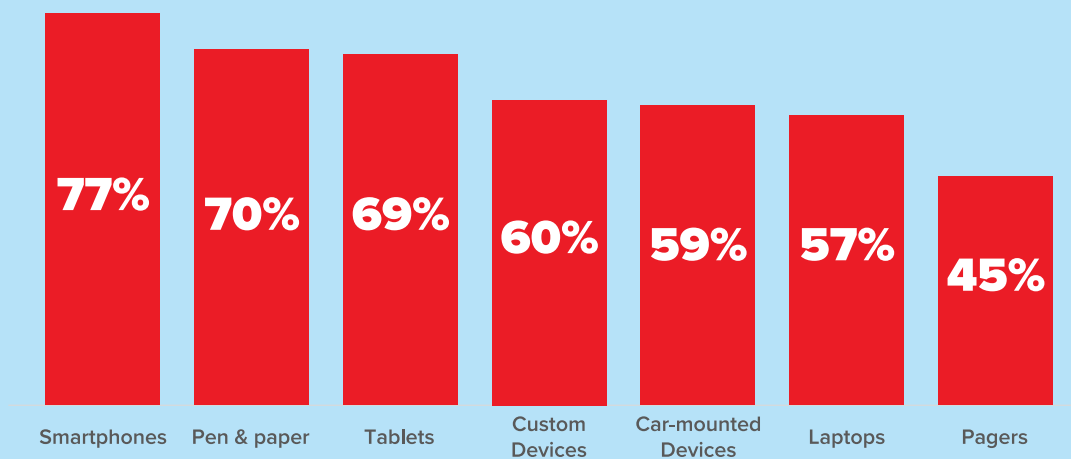

### Human Factors

- Reduced injuries
- Enhanced ability to attract skilled workers
- Improved employee morale and happiness

## How safety data is collected

Most organizations collect safety data both online and offline, with smartphones coming in as the most popular method. Incredibly, **70% of respondents** indicate they still collect some **data** using **pen and paper**.

### Technology Employees Have Access to for Collecting Data in the Field
