

Automating Field Inspection Management for Construction

Fulcrum is a field inspection management platform that digitizes quality and safety inspections to maximize field team performance and agility — without writing code

High-Performance Inspections

The Fulcrum field inspection management platform improves the **uniformity**, **flexibility**, and **speed** of safety, quality, and maintenance. With Fulcrum, you will:

- *Drive intelligent automation to maximize field team performance and agility*
- *Harness the value of location for mobile teams*
- *Ensure process rigor and compliance at scale*
- *Create real-time visibility into inspection performance across inspectors, teams, and stakeholders*
- *Digitally transform quality, safety, and maintenance inspections*

The SaaS-based **Fulcrum Field Inspection Management** platform accomplishes this by digitizing inspection processes, providing **intelligent automation** for inspection teams, and delivering **data-driven reporting** and **analytics** to drive safer and higher-quality outcomes.

DIGITIZE QUALITY & SAFETY

By digitizing quality and safety inspections with the Fulcrum platform, you can:

- *Adapt quality control, safety, and data collection processes to meet requirements of different clients and contractors*
- *Document quality, safety, and maintenance compliance through images and video*
- *Demonstrate your improved safety posture for a lower EMR and a better company brand*
- *Obtain on-site safety and quality control sign-off from all parties*
- *Capture information from any source, including visual inspections, nondestructive testing, drones, and more*

Thousands of clients with **tens of thousands** of users are **transforming** their inspection processes with the Fulcrum Field Inspection Management platform.

Digitize inspection processes

Simplify field inspections with easy-to-use checklists, team-wide issue and task management, and fully customizable inspection processes that only take minutes to create. Even people outside your organization can identify issues, without downloading software, just by scanning a QR code.

Intelligent automation for inspection teams

Streamline inspection processes on Day 1 with easily configurable workflows, task templates, and safety and quality process validation via an out-of-the-box issue management framework. Collaborate at scale to unify inspection teams while optimizing each role.

Data-driven reporting and analytics

Promote organization-wide improvement using actionable insights from real-time reports, performance dashboards, and location-aware analytics. Empower your field staff with preloaded maps while you make the most of built-in consistent, timely, and quality-rich location intelligence to guide your business decisions.

The Fulcrum Field Inspection Management platform can transform your inspection processes to ensure safer, higher-quality, and more compliant outcomes. **Try it for free for 30 days!**
